

# hi-tech SECURITY solutions

## Editorial sections 2010

<b>News and events</b>	<i>Hi-Tech Security Solutions</i> covers the latest happenings in the security industry.
<b>Calendar of events</b>	Our calendar of events is a reader service aimed at highlighting as many of the security-related events in and around southern Africa as possible. Send in any information on conferences, exhibitions, training or road shows that are open to the industry and we will list as many as we can fit on our events page.
<b>African security perspective</b>	It's easy to think the South African market is where it's at, but there are enormous opportunities in the security sphere in the rest of Africa. <i>Hi-Tech Security Solutions</i> will focus on security projects and successes in this fast-growing region.
<b>Access control, ID management, smart cards</b>	From punch clocks to biometric readers to RFID tags, <i>Hi-Tech Security Solutions</i> covers the access and identity industries with news, views and interviews, not to mention trend-setting articles offering a glimpse of the future.
<b>Alarms &amp; intrusion</b>	It's no use raising the alarm when the intruders are gone. <i>Hi-Tech Security Solutions</i> covers the latest in products and solutions designed to proactively protect premises and people and raise the alarm before an event.
<b>Fire prevention, detection and suppression</b>	<i>Hi-Tech Security Solutions</i> keeps its eye on the burning issues in fire prevention, detection and suppression.
<b>Perimeter security</b>	Keeping controlled access and scoundrels out is the first step in security. <i>Hi-Tech Security Solutions</i> covers the latest in local and international perimeter security solutions.
<b>Surveillance</b>	Analogue, IP, hybrid and anything else related to surveillance, <i>Hi-Tech Security Solutions</i> covers it all. Regular case studies demonstrate best practices as they are implemented around the globe.
<b>Enterprise solutions</b>	Large companies are today more inclined to look at integrated solutions that incorporate security, facilities management and various other aspects of building and HR systems. <i>Hi-Tech Security Solutions</i> covers enterprise solutions, from local and international best-practice case studies, through to the latest in enterprise software.
<b>Convergence</b>	Convergence has been an industry on its own for far too long. <i>Hi-Tech Security Solutions</i> examines the inexorable trend that will see traditional security operations and IT converge and cooperate to form a far stronger security front to protect organisations and their people.
<b>IP communications &amp; network technology</b>	While IP will eventually be ubiquitous, today's corporate security infrastructure still consists of the latest in IT technologies and networks, as well as traditional analogue communication systems. <i>Hi-Tech Security Solutions</i> is leading the pack with best practices, insight and advice.
<b>Information security</b>	You can't leave IT out of any security solution. <i>Hi-Tech Security Solutions</i> focuses on how to ensure your IT systems and your corporate data are as secure as your premises.
<b>Risk management</b>	In the high-crime society we live in, the issue of physical guarding and security management services is a crucial part of risk management and we focus intently on trends, issues and companies in this field. Corporate governance is also a phrase that brings immediate pain to executives and boards due to regulations like the new Companies Act and best practices such as King III. <i>Hi-Tech Security Solutions</i> will focus on these and other risk management issues companies face today.
<b>Product update</b>	Got a new security product? <i>Hi-Tech Security Solutions</i> wants to introduce it to the world.
